Coma d'en Pou

2021

WEATHER REPORT Cool autumn and cold winter. Heavy snowfall in January left good moisture and water reserve in the soil. The total rainfall was 495 liters, of which almost 100 liters fell during harvest. Heavy and severe hailstorms on July 30 and 31 decreased grape production. Vines' bud break in late March. Flowering began in the second week of June when the grapevines bloomed. The *veraison* (onset of ripening) began on July 19th. Nice summer in general, with a sharp rise in temperatures in the second week of August. Ripening of the grapes was slower than usual getting lower alcohol levels than in previous harvests. Very long harvest due to the rains during the harvest season and the work of picking and selecting the grapes done directly in the field.

LA COMA D'EN POU The property called "Les Comes d'En Pou" is situated at the east of Gandesa, at the stirrups of "La Serra de Cavalls". A "Coma" in Catalan means a depression or valley shallow in mountain areas. Our property of "La Coma d'En Pou" has 10 ha, distributed among vineyards, olive groves and scrub. The soil has an elevated proportion of lime and active presence of eroded conglomerates.

VARIETY We speak about "Grenaches in harmony", because it is a plantation where we find mixed clones and different types of Grenaches, as was done in the past, including black Grenache, hairy and a little red grenache. It is harvested and vinified together. (Field Blend). Organic and dry farminig.

HARVEST Manual, between 20th - 27 september 2021.

WINEMAKING PROCESS Fermenting in open barrels and in stainless steel tanks in its own yeasts. Macerate with the skins for 17 days. A small part is vinified with the stems. Subsequent aging in 500-liter French Allier oak barrels of 400 and 500 liters for 16 months.

PRODUCTION 3174 bottles de 0'75 l., 175 Magnums y 7 double Magnums.

BOTTLED 3th march 2023.
