Coma d'en Pou

2018

WEATHER REPORT The weather station of Gandesa measured 401.81 l / m² during the agricultural year. 148 l/m² fell torrential in two strong thunderstorms in October and November, which caused damage to some farms and left little humidity in the soil. The end of autumn was dry and cold, the winter was cold and dry as well, with many windy days and little fog. April began fresh and the vines were starting to sprout on April 15th. The vines were flowering end of May and the veraison took place in the end of July. Good spring rains allowed a good development of the vines, but the prophesized abundant harvest wasn't confirmed at the moment of the harvest. Strong heat periods in July and August. Beginning of the harvest on August 27th. Calm harvest without any rain.

LA COMA D'EN POU The property called "Les Comes d'En Pou" is situated at the east of Gandesa, at the stirrups of "La Serra de Cavalls". A "Coma" in Catalan means a depression or valley shallow in mountain areas. Our property of "La Coma d'En Pou" has 10 ha, distributed among vineyards, olive groves and scrub. The soil has an elevated proportion of lime and active presence of eroded conglomerates.

VARIETY Red Grenache and Hairy Grenache.

VENDIMIA Manual, 24th september 2018.

WINEMAKING PROCESS Maceration during 13 days in open oak barrels, where the same wine ferments with the indigenous yeasts. A little part is vinified with stem. Aged in French Allier oak barrels of 400 and 500 liters for 18 months.
