Bàrbara Forés Rosat 2025

CLIMATOLOGY: The vineyard has grown with great vigor and has recovered from the great drought suffered in 2024. At the end of May the landscape of Terra Alta was an intense green color. We have had a lot of work to control the growth of the weeds. After that, the month of June has been one of the warmest Junes we can remember. Historically hot end of June and beginning of July. On July 12, almost 80 liters fell accompanied by hail, severely affecting grapes and leaves especially in the vineyards of Senia and Coll de Joaquin. Very humid autumn, especially from the beginning of October to the middle of November. Total rain in the agronomic year is 578.50 liters. Veraison begins July 20th. The harvest begins on August 15th.

VARIETIES: Garnacha Tinta (78%), Cariñena (22%).

HARVEST DATES: Between August 15th and 27th 2025.

WINEMAKING: Cold skin maceration for 30 hours followed by bleeding of the must. Fermentation with its own yeasts in stainless steel tanks.

BOTTLING: May 12th 2026

PRODUCTION: 4090 bottles of 75 cl.
